

## DIRECTIONS

Cut to size with a utility knife or scissors. Apply the tape carefully, smoothing out any pockets or rolls.

Tips for creating a loop for hauling, lifting, or bundling applications:

- Ensure no creases or folds in the tape as this may decrease the tensile strength of the tape.
- Use adequate overlap of the tape to ensure sufficient adhesion to prevent any adhesive creep.
- Use more tape and additional wraps for heavier loads.

## TECHNICAL SPECS

**APPLICATION TEMPERATURE** – 40°F to 120°F, best at room temperature

**SERVICE TEMPERATURE** – Continuous up to 150°F

**OUTDOOR** – Yes

**MOISTURE RESISTANT** – Yes

**STORAGE TIPS** – Store in a cool, dry location. Keep out of direct sunlight.
