Notes & Details

Keep your kitchen free of condensate and steam with this Halifax CHO336 3' x 36" type 2 condensate hood. This unit is suitable for use over any equipment that has a surface operating temperature under 600 degrees Fahrenheit, and that is required by fire code to have a type 2 hood - this includes equipment such as high-temperature dishwashers, ovens, and pasta cookers. It is not for use over grease-producing equipment. The hood removes the steam and heat produced by your equipment and makes your kitchen a much more comfortable place for employees to work! It is an exhaust-only design with no makeup or supply fan and contains the hood only, the exhaust fan is sold separately.

The hood uses (1) 12" x 12" wire mesh filter. 18-gauge 304 stainless steel is used on all exposed surfaces to give it excellent durability and cleanability, while the MIG-welded frame provides seamless, liquid-tight joints. The hood features a box-style canopy design to provide superior performance.

This hood should be used in applications where the ceiling is 10' or taller. 4 hanger brackets are included to make installation easy.
