**FABULOSO™
ROTISSERIE**

**THE WORLD'S FINEST COMMERCIAL
SMOKERS, GRILLS, AND ROTISSERIES**

PRODUCT DESCRIPTION

The Fabuloso is a popular model that's available in a variety of configurations, including arched top, flat top, double opening – customer side opening and kitchen side opening – and double rotisserie. Finished in your choice of exteriors, it will make a striking impression on your customers and your bottom line. When they see your food cooking before their eyes, illuminated by the warm glow of the wood fire, they won't be able to resist.

Combining many elements perfectly into one extraordinary piece of cooking equipment is what our rotisseries are all about. We pioneered the gas infrared burner/wood-fired rotisserie concept in the early 1990s, and we've become the source for display rotisserie cooking in America's finest restaurants. And, we're proud to work closely with the finest chefs and restaurateurs to create custom rotisseries to meet their vision and their needs.

FEATURES & BENEFITS

Unmatched flavor and texture – the wood fire not only creates the warm ambiance that diners love but infuses rich flavor to the rotisserie foods. Standard units are doorless and do not impede the customer's view. This open design also creates meats that are moist inside with a crisp outside texture.

High-temperature refractory-lined fire chamber – insulated throughout – this unit is very fuel efficient and safe. Infrared gas burners enable fast cooking while retaining moisture of the meat.

Planetary innovative gear design enables each spit to turn independently while the entire rotisserie array revolves too. This action cooks the meat evenly while allowing the natural juices to baste the meat.

High-capacity rotisseries are easy to load and unload.

Easy to clean – includes a built-in drip pan featuring a sloped bottom, strainer-equipped drain valve, directed water spray nozzles, and stainless steel interior.

Log-lighter burner below wood fuel for fast and easy fire starting.

Heavy duty construction – they're built to last!

Great selection of exterior finishes to match your decor and create a focal point in your restaurant. You can have the color of your choice. It's up to you.
