Notes & Details

Improve the experience of sitting around the dinner table with the Lancaster Table & Seating black fabric magnetic cushion. Designed for outdoor use with your existing Lancaster Table and Seating Alloy bar stool (sold separately), this cushion provides guests with a comfortable place to sit during their visit. The cushion magnetically connects to the seat and can be easily secured and removed! Plus, it is water-resistant for use outdoors. Adding a layer of foam between your guests and their seats will amplify their comfort, enticing them to stay longer and enjoy more. Aside from the comfort, this 1 1/4" thick cushion is made with CAL117 fire-retardant foam, decelerating the potential of smoldering spread to ensure the safety of your guests, employees, and establishment.

Take your dining experience to the next level with this stylish cushion. The black color blends well within nearly any environment while maintaining that classy, modern feel; and with the wide variety of colors offered within the Alloy line, there is ample variation to match nearly any theme or decor. The magnetic cushion cover makes installation straightforward. Simply secure and remove the cushion without the need for tools or instructions. Plus, the magnetic cover is safe for outdoor use. You can also use this cushion as a replacement for your industrial bar stool that came standard with a fabric magnetic cushion!

Cleanup remains as easy as it was without the cushion since the fabric exterior protects the foam from direct contact with spills and other natural elements. Simply remove the fabric cover and wash to remove blemishes. The cover is even machine washable! Get the most out of your Lancaster Table & bar stool Alloy bar stool by adding comfort and style to your business with the black fabric cushion.
