Notes & Details

Design your own dining room, just the way you want, with this Lancaster Table & Seating cast iron 30" x 30" black 3" bar height column table base! This cross-shaped cast iron table base makes it easy to add the compatible table top of your choosing. Round or square, light or dark - the options are endless for creating a sturdy bar height table! Whether you're just opening your first restaurant or are looking to replace the old tables in your bar, we've got the perfect product for you.

A heavy-duty, cast iron, cross-shaped base offers durability and stability to your table with this table base. It includes non-slip floor glides to keep the table from wobbling or shaking, while also protecting floors from scratching when you move tables to clean or combine. An included chrome foot ring lets your customers rest their feet, as opposed to dangling them, for a more comfortable dining experience.

This base's column is made of durable steel to support the heavy weight of table tops and their contents. It measures at 3" in diameter with a threaded interior rod that easily affixes to the spider plate. The spider is made of a heavy cast iron with 8 pre-drilled holes for the included pan head screws to secure the column to the tabletop. This base is able to hold up to a 36" round tabletop by itself, without the support of additional bases. It is finished with an attractive black powder coat for a sleek, professional appearance.
