Notes & Details

Dispense water with efficiency and style using this Narvon 8 GPH countertop water dispenser with chilled, ambient, and sparkling water options. This water dispenser boasts a durable stainless steel construction with a backlit plexiglass front panel for a sleek, modern look. Its tall dispensing area accepts most large water bottles, and it features 2 easy-to-use manual taps, allowing you to dispense 2 drinks at once. This unit is able to dispense ambient, chilled, and sparkling water with a CO2 cylinder (sold separately). It allows you to adjust your water temperatures, serving cold water from 41-53.6 degrees Fahrenheit and ambient water from 60.8-89.6 degrees Fahrenheit. This unit has a cooling capacity of 8 gallons per hour with a maximum continuous cooling rate of 1.6 gallons per hour

With convenient push-connect fittings, this unit is easy to install. It is great for small- to medium-sized offices and restaurants, and it has a stylish design that fits into any space. To keep your unit from overheating, this dispenser includes a forced ventilation grill, while its integrated drip tray catches any spills to help keep your space clean and dry. Better yet, it gives you the option to clear the liquid in the drip tray directly into your drain for easier maintenance. This dispenser uses R-290 refrigerant, and it requires a 120V electrical connection for use. Effortlessly serve a variety of water options to staff and guests with this Narvon water dispenser!
