Certifications

3/4" Water Connection

Notes & Details

Add versatility to your hose reel with this Regency heavy-duty front trigger spray nozzle! This helpful tool attaches to the end of your hose to provide a quicker and easier way to rinse items. It provides a steady, controlled flow of water with a rate of 5 GPM. To withstand heavy-duty usage, it features a durable blue rubber cover.

This unit includes a trigger lock to ensure easy use during extended spray sessions. It can be used as an additional accessory for your hose, or as a direct replacement for the one that came standard with your hose reel kit. The spray valve sports an adapter that has a 3/4" female NPT inlet. This tool should not be used with foodservice pre-rinse faucets due to the high GPM.
