Certifications

Certified by NSF

Notes & Details

Transport your dough boxes with ease using this Regency 25 1/4" x 17 3/4" x 7 1/2" dough box truck. This dolly saves you time and effort and helps ensure that your dough is always ready to go wherever you need it! It's made from aluminum for outstanding durability. Its contoured profile allows for quick and easy maneuvering of your bakery items from one location to another, and the 5" casters allow for a wide range of motion and make turning and reversing simple. There's no need to worry about these casters leaving marks on plant or retail floors either, because they feature a non-marking design for smooth transportation.

This dolly is ideal for transporting dough balls to make pizza, bread, buns, desserts, and other goods within your pizzeria, restaurant, or bakery. After a morning of high-volume measuring and mixing, slide all of your unbaked dough into proofing boxes (sold separately) and onto the dolly to be transported in one easy load. Perfect for bakeries, hospitals, diners, and hotels, this dough box truck is a great way to store and transport dough boxes.
