Notes & Details

Do your plumber a favor and have this wall-mount faucet installation kit on hand! It comes with everything you need to properly install a wall-mounted faucet. By purchasing this kit with your sink or faucet, you'll save yourself a trip to the hardware or plumbing supplies store, and avoid being over-charged by the plumber too! The threaded end of the elbow attaches to the end of your faucet, while the unthreaded end is meant to be soldered to a 1/2" copper water inlet pipe. These elbows have straight threads that can be paired with plumber's tape or liquid pipe sealer to create a water tight seal. This kit will work in a variety of applications and with many popular faucet brands.

Kit Includes:

- (2) 1/2" NPT brass elbows (1 threaded end)
- (2) 1/2" NPT brass nipples
- (2) Rubber washers
- (2) Flanged nuts
