Notes & Details

This Regency 1/2" NPT inlet kit is the perfect way to install wall-mounted faucets! It contains (2) 24" long flexible supply hoses with a 1/2" NPSM female connection for the elbows and a 3/8" compression female fitting to connect to your building's hot and cold supply lines. Their braided stainless steel construction provides superior strength and helps it to resist punctures and damage. Additionally, the (2) 1/2" NPT inlet shanks and elbows form a 90 degree angle to direct the water flow into the faucet body. This prevents kinks and stress on the supply hose for greater reliability. When installing a new faucet, use a new inlet kit to ensure optimal performance. This kit is perfect for use on Regency wall-mount faucets, but will also fit any other wall-mounted faucet brand that comes with 1/2" NPT inlets.

Kit Includes:

- (2) Elbows with 1/2" NPT male supply nipples
- (2) 24" stainless steel flexible supply hoses
- (2) Lock nuts and washers
- (2) Short elbows with 1/2" NPT male inlet and 1/2" NPT male outlet
