

Regency Blue Powder-Coated Steel Open Air / Water Hose Reel with 50' x 5/8" Hose

#600HRPC5850

Technical Data

Length	19 1/2 Inches
Width	7 1/2 Inches
Height	21 3/4 Inches
Hose Length	50 Feet
Hose Interior Diameter	5/8 Inch
Application	Air Water
Color	Blue
Connection Type	3/4" Male / Female GHT
Features	Corrosion-Resistant

Features

- Corrosion-resistant, powder-coated steel reel with 50' hose
- Reinforced steel-stamped guide arm reduces angular pull for precise control
- Multi-position release ratchet spring locks hose at preferred length
- 4 non-slag direction rollers reduce hose wear abrasion
- Prevents reverse winding to eliminate potential damage

Technical Data

Included	Hose
Inlet Size	5/8 Inch
Material	Powder Coated Steel
Maximum PSI	300 PSI
Mounting Style	Surface Mounted
Pressure	Low
Return Style	Retractable
Style	Open
Temperature Range	-4 - 140 Degrees F
Type	Hoses Reels

Notes & Details

Equip your business with the Regency blue powder-coated steel open hose reel with a 50' hose! Designed for versatile use in air and water applications, this convenient, spring-driven modular hose reel can be located precisely where it's needed most. With a multi-fit bracket, the base is built to be mounted on walls, ceilings, or floors for convenient access in janitorial locations and commercial kitchens. This item is made with a blue powder-coated, corrosion-resistant steel housing for durable, long-lasting use and includes (1) 50' hose with a 5/8" inner diameter for air and water applications.

Designed to keep your hose neat and tangle-free by efficiently rewinding the part that is not in use, this durable reel features a reinforced steel-stamped guide arm that reduces angular pull, ensures precise control over the direction of the hose, and retracts smoothly and effortlessly for optimal performance. The reel is made with 4 non-snag direction rollers that reduce wear to maintain the integrity of the rubber hose, and a fully enclosed, multi-position release ratchet spring locking mechanism that allows you to lock the hose at the user's preferred length. It also includes a speed control device for slow, safe automatic rewinding of the hose that prohibits reverse winding to prevent damage to the unit. This hose reel is rated to 300 PSI and features a temperature range from -4 degrees Fahrenheit to 140 degrees Fahrenheit.
