Type	Hoses Reels

Notes & Details

Equip your business with this Regency hand-crank hose reel. Perfect for a variety of settings, this hose reel is designed to keep your hose within easy reach so you're able to service every area of your workstation safely and efficiently. With a simple installation, it makes storing and handling your hose easier than ever. It has a 3/8" inlet size, is rated at 300 PSI, and can accommodate up to a 100' long hose (sold separately). This versatile hose reel is the ideal solution for your janitorial location or commercial kitchen!

For simple mounting, this reel hose features a multi-fit bracket. The base is built to mount on a wall or workbench for quick and convenient access. The steel reel is powder-coated and corrosion-resistant for durable use. It is fitted with a hand crank and brake for effortless extension that prevents the reel from releasing more hose than you need. This design is just what your facility needs to distribute water or air to the right places!
