Notes & Details

This Regency pre-rinse add-on faucet is an excellent choice when you need a reliable way to fix or upgrade your Regency pre-rinse faucet! Designed for simple installation and maintenance, it's easy to see why Regency faucets are a great solution for any business. With the 18" add-on faucet spout, you can use your pre-rinse like a normal faucet! The swing design delivers water exactly where you need it, and it lets you adjust it to fill multi-compartment sinks. This double-jointed spout also offers additional versatility because you can rotate each section independently, or fold it to the side to make way for especially large or bulky items.

With a chrome-plated brass body and ceramic cartridges engineered for durability, you can install this product with confidence. Use it to replace a broken add-on faucet or to upgrade a pre-rinse unit that didn't come with a faucet base. It installs between the base and the riser easily, with its 3/8" MNPT inlet and 3/8" FNPT outlet. The water exits the faucet through a 2 GPM aerator, which creates a soft flow pattern with minimal splashing.
