Notes & Details

This Regency 1.15 GPM spray valve and hose assembly is a perfect replacement for the one that came standard on your Regency pre-rinse faucet (sold separately). It features an easy-to-use, ergonomic squeeze handle with a hold-down ring that lets you lock the handle in place if you'll be using it for a long period of time. Thanks to its 44" flex hose, this spray valve is able to reach multiple sink bowls, making it particularly useful in a three compartment sink setups.

This sprayer assembly is even compatible with other popular faucet brands, so you're not limited in your selections. With a 60 PSI rating, it's great for getting larger food particles off of your pots, pans, and equipment parts as you clean them for the next use.
