Notes & Details

Prevent unpleasant sewage odors and gases from escaping your drain pipe with this Regency PTRAP chrome P-trap! Thanks to a purposeful curved design, water is trapped in the "U" shaped pipe, which then acts as a barrier against the odors and gases that would otherwise drift up and out into the air. If you notice foul odors coming from your sink, check to make sure your P-trap is functioning properly. If it isn't, use this replacement piece to get things working again as soon as possible! This heavy-duty, 22 gauge chrome p-trap has a 1 1/2" IPS drain connection.
