Features	NSF Certified
Finish	Epoxy
Material	Epoxy-Coated Epoxy-Coated Metal Polymer Wire
Number of Shelves	4 Shelves
Style	Mobile Vented
Type	Drying Racks Shelving Kits
Usage	All Environments Dry Environments Kitchens Walk-Ins

Notes & Details

Keep your storage area organized with the commercial-grade Regency+ 18" x 36" green epoxy polymer drop mat 4-shelf kit with casters and 64" posts! This NSF green epoxy shelf kit includes (4) 18" x 36" shelves with polymer drop mats and (4) 64" posts, which allow you to create a convenient storage solution for your janitorial closet, warehouse, or walk-in cooler. Incredibly easy to install, this kit can be quickly assembled once it arrives so that you can begin using it immediately! For maximum versatility, the green epoxy coating allows for use in either dry or moist environments, making the unit a commercial-grade, multipurpose investment that's sure to accommodate your ever-evolving needs. Plus, because it includes 5" casters, this particular unit provides the benefit of mobility, making it easy to move aside for thorough cleaning.

Each shelf features a wire construction for proper ventilation of stored products and removable polymer drop mat. They're adjustable, too; since the posts are marked in intervals and use a split sleeve system of assembly, the shelves are easy to move higher or lower along the posts. This is especially great for expanding businesses that may not have finalized their product offerings. To protect the shelves, the shelves come with a drop mat. Since the mats are also removable, you can quickly take the mats off for cleaning. In fact, the mat sections can even be run through a commercial dishwasher to save you time and effort during the cleaning process.

This unit comes with 16 pairs of split sleeves, and each shelf accommodates up to 600 lb. of weight. The shelving unit requires assembly.
