Notes & Details

Keep your storage area organized with the commercial-grade Regency+ 24" x 48" green epoxy polymer drop mat 4-shelf kit with 74" posts! This NSF green epoxy shelf kit includes (4) 24" x 48" shelves with polymer drop mats and (4) 74" posts, which allow you to create a convenient storage solution for your janitorial closet, warehouse, or walk-in cooler. Incredibly easy to install, this kit can be quickly assembled once it arrives so that you can begin using it immediately! For maximum versatility, the green epoxy coating allows for use in either dry or moist environments, making the unit a commercial-grade, multipurpose investment that's sure to accommodate your ever-evolving needs.

Each shelf features a wire construction for proper ventilation of stored products and removable polymer drop mat. They're adjustable, too; since the posts are marked in intervals and use a split sleeve system of assembly, the shelves are easy to move higher or lower along the posts. This is especially great for expanding businesses that may not have finalized their product offerings. To protect the shelves, the shelves come with a drop mat. Since the mats are also removable, you can quickly take the mats off for cleaning. In fact, the mat sections can even be run through a commercial dishwasher to save you time and effort during the cleaning process.

This unit comes with 16 pairs of split sleeves for quick and easy setup and installation. To assemble, simply snap 2 split sleeves around each post at one of the incrementally-notched lines. After you snap the split sleeves on, fit a shelf down over each post to hold it in place.

Each shelf accommodates up to 600 lb. of weight. Likewise, a foot is provided for each post and must be used for proper installation. The shelving unit requires assembly.
