Shape	Pentagon
Shelving Style	Office Storage
Style	Adjustable Vented
Type	Components
Usage	All Environments Dry Environments Front of House Garage Moist Environments Retail Stock Rooms Warehouse

Notes & Details

Make the most of your space with this Regency 21" deep NSF black epoxy wire pentagon corner shelf! Boasting a pentagon design, this shelf fits perfectly into corners. It is great for utilizing unused space in your establishment for ultimate efficiency. It can be used with standard shelves of the same depth to create a cohesive storage unit with a seamless transition around corners. This shelf includes one angled side that takes up less space than a traditional shelf to stop the shelf from protruding. When combined with other Regency shelving, this shelf can hold up to 600 lb. of evenly distributed weight. This shelf accommodates business growth as storage needs evolve and product inventory expands!

For maximum versatility, the black epoxy coating creates a professional backdrop that is ideal for use in retail settings. Featuring a durable, commercial-grade construction, this shelf is built to withstand daily use in your establishment. The wire design allows for proper airflow around the stored supplies, products, or ingredients and is fully adjustable to accommodate products or equipment of varying shapes and sizes. This shelf offers the rigidity of solid metal with the convenience of being adjustable without tools or hardware.

It features 5 pairs of split sleeves for quick and easy setup and installation. To assemble, simply snap 2 split sleeves around each post at one of the incrementally notched lines. After you snap the split sleeves on, fit the shelf down over each post to hold it in place.
