Notes & Details

Add additional stability to your black epoxy shelf with this Regency 24" x 24" black 3-sided frame! This frame is ideal for extra support when storing bulky kegs, food storage containers, and other heavy-weight items. It prevents the structure from buckling, protecting your products and employees. This frame is coated in epoxy, preventing rust and corrosion in damp, cool environments, making it great for use in walk-in coolers and refrigerators! The three-sided design attaches to all four posts of your shelving unit, ensuring superior strength.

This shelving frame is especially well-suited for dunnage racks. It adds support and helps fortify the racks to accommodate their heavy loads. It's also ideal for standard shelving units when a shelf is skipped. A skipped shelf diminishes the unit's rigidity by focusing weight onto the posts, which increases the chance of buckling. When the frame is added into the open space, it helps to more evenly distribute weight and to enhance structural rigidity. Measuring 24" wide by 24" long, it's the perfect complement for your 24" x 24" Regency shelf (sold separately)!
