Notes & Details

Add additional stability to your black epoxy shelf with this Regency 24" x 36" black 3-sided frame! If you plan to store bulky kegs, food storage containers, and other items on the shelf in your walk-in cooler, it's helpful to have additional support to keep the structure from buckling. This frame is perfect for the task, and its epoxy coating means that it won't rust or corrode in damp, cool environments! The 3-sided design attaches to all four posts of your shelving unit to make sure it is strong and secure, no matter how much you need to store.

This shelving frame is especially well suited for dunnage racks, as it adds support and helps fortify the racks to accommodate their heavy loads. It's also perfect for standard shelving units when a shelf is skipped. A skipped shelf diminishes the unit's rigidity by focusing weight onto the posts, which increases the chance of buckling. When the frame is added into the open space, it helps to more evenly distribute weight and to enhance structural rigidity.
