Notes & Details

Outfit your retail business with this Regency black epoxy 5-shelf angled mobile merchandising rack! Featuring (4) 24" x 60" slanted shelves and (1) 24" x 60" flat shelf, the unit is perfect for use in your front-of-house area to display a wide range of products. The slanted shelves make for easy access and visibility, while the flat shelf provides merchandising versatility. Plus, each of the shelves is adjustable along the rack's (4) 64" tall posts to accommodate your ever-evolving product offering!

This particular merchandising rack is built with a black epoxy finish, making it attractive enough for display areas and durable enough for damp environments. For added structural stability, the rack comes standard with a 3-sided frame that attaches to the posts. Its weight capacity is impressive too, with each slanted shelf accommodating up to 400 lb. of evenly distributed weight and the flat shelf holding up to 600 lb. of weight. This commercial-grade construction ensures that it's built to last, even with constant use in high-volume operations.

A set of (4) 5" polyurethane casters is included for mobility, and each caster features a brake to ensure secure, stationary use.
