Type	Basket Shelving Kits Shelving Kits
Usage	Dry Environments Front of House Garage Kitchens Retail Stock Rooms Warehouse

Notes & Details

Maximize your establishment's storage and display space with this Regency 24" x 36" chrome 4 post basket kit! This kit includes 4 post basket shelves and (4) 64" posts with 5" casters to create a convenient storage solution for your retail store, restaurant, warehouse, or hospital. Its durable, chrome-plated metal construction ensures long-lasting use in your establishment.

This unit features 4 basket shelves with a drop front and sloped sides to help prevent your products from falling out. With an open wire mesh design, these shelves ensure proper airflow around your stored supplies, products, or ingredients. They're also adjustable, since the posts are marked in 1" increments and use a split sleeve system of assembly. This makes the shelves easy to move higher or lower along the posts. Each shelf can hold up to an impressive 300 lb. of evenly distributed weight, making it the perfect place for storing bulk ingredients and heavy supplies.

The posts accept the included 5" casters, providing quick and easy mobility. Please note that while these do make the rack mobile, it is still designed for storage and not transport applications. Moving it from the wall for cleaning is an appropriate use of its mobility. With its high-quality, commercial-grade design, this unit is sure to deliver the reliable performance every business expects and needs!
