Notes & Details

Securely store and transport items in your restaurant, warehouse, or grocery store using this Regency 24" x 48" chrome shelf basket! Designed to fit onto your shelving unit in place of a traditional flat shelf, this 4 1/2" deep shelf basket provides optimal storage space while preventing items from falling during transport, loading, or unloading. Its durable, chrome-plated construction ensures long-lasting use in your establishment. This versatile shelf basket can also be used for your front-of-house display and merchandising at your grocery store, market, or retail space.

This basket's open design combined with the ability to adjust it to different heights ensures proper ventilation and maximum airflow between and around your stored products. A tapered design ensures optimum storage flexibility, enabling it to fit perfectly on mobile and stationary shelving units, as well as utility carts. When combined with other Regency shelving posts and accessories, this shelf basket can hold up to 600 lb. of evenly distributed weight, making it ideal for storing bulk and heavy supplies. Plus, the high weight capacity helps the shelf basket accommodate business growth as storage needs evolve and product inventory expands. Each basket purchased comes with four pairs of split sleeves that are used to attach the basket to its compatible posts (sold separately).
