Notes & Details

Make the most of your space with this Regency 24" deep NSF green epoxy wire pentagon corner shelf! Its unique pentagon shape is designed to fit into corners to utilize unused space in your establishment for ultimate efficiency. It is also designed to be used with standard shelves of the same depth for a seamless transition around corners to create a cohesive storage unit. It features one angled side that takes up less space than a traditional shelf so it fits into corners perfectly, without protruding. When combined with other Regency shelving, this shelf can hold up to 600 lb. of evenly distributed weight. The high weight capacity helps the shelf accommodate business growth as storage needs evolve and product inventory expands.

For maximum versatility, the green epoxy coating on this shelving unit allows for use in either dry or moist environments, making the unit a commercial-grade, multipurpose investment that's sure to accommodate your ever-evolving needs. Featuring a durable, commercial-grade construction, this shelf is built to withstand daily use in your establishment. With a wire construction, this shelf allows for proper airflow around the stored supplies, products, or ingredients. Plus, it's fully adjustable to accommodate products or equipment of varying shapes and sizes. This product also offers the rigidity of solid metal but can easily be adjusted without tools or hardware.

This shelf comes with 5 pairs of split sleeves for quick and easy setup and installation. To assemble, simply snap 2 split sleeves around each post at one of the incrementally notched lines. After you snap the split sleeves on, fit the shelf down over each post to hold it in place.
