Notes & Details

This Regency half-size mobile aluminum can rack for #10 and #5 cans with a stainless steel top and a base for installing a #1 can opener is an ideal choice for restaurants, hospitals, retirement communities, schools, and other food service businesses that need to store large numbers of food cans! Designed to hold up to (72) #10 cans or (95) #5 cans, this unit can be loaded from the front or the rear so your staff can utilize a first in, first out system for stock rotation.

Made of all-welded, 1 1/2" aluminum tubing, this can rack is built to take a beating in your commercial or institutional environment. Additionally, it features angled can guides that allow cans to roll to the front of the unit for easy access. This rack is mounted on (4) 5" swivel casters so that it can be rolled from your storage area to your prep area as needed, and 2 of the casters have brakes to allow you to lock it into place during loading and unloading.

This can rack ships assembled so that you can immediately start using it to organize your storage space, and it comes with a stainless steel top that can be used as an extra shelf or work space. Plus, it comes with a Garde stainless steel #1 can opener base mounted on the top so that you can easily install your can opener (sold separately) in a convenient location. While the can opener does not come with it, this unit is a great option if you already have a can opener and are just looking to upgrade your food can storage system!
