Notes & Details

A great way to add a convenient storage solution to a wide variety of operations, this Regency Spec Line 21" x 36" NSF solid shelf offers the reliable performance you need and demand! Unlike wire shelving where small components may slip through the cracks or leaking packages may contaminate products on lower shelves, this solid shelf allows you to confidently store products of any type and size. Whether you need to store bulk ingredients, heavy prep tools, cleaning supplies, or even small industrial components, this spacious shelf gives you plenty of room to store all of your essential supplies.

An excellent choice for everything from dry ingredient storage to industrial applications, this shelf's solid, flat surface also makes it extremely simple to clean. For added versatility and long-lasting performance, it is made of 18 gauge type 304 stainless steel that makes it exceptionally resistant to corrosion, allowing it to be used confidently in oceanside shops, warewashing areas, and other damp environments! Plus, the unit's high-quality design is commercial-grade and delivers the reliable performance every business expects and needs. When combined with additional shelves, posts, and accessories (sold separately), this Regency Spec Line shelf is capable of holding up to an impressive 700 lb. of evenly distributed weight. And thanks to the four pairs of split sleeves, this shelf can be easily adjusted to accommodate any shape and size of product.
