Features

- Suitable for both wet and dry environments
- Includes 4 pairs of split sleeves
- Built to accommodate up to 700 lb. of evenly distributed weight
- Durable type 304 stainless steel construction is resistant to corrosion
- Open design facilitates airflow around products

Certifications

Certified by NSF

Technical Data

Style	Vented
Type	Components Shelves
Usage	All Environments Dry Environments Garage Kitchens Moist Environments Outdoor Stock Rooms Walk-Ins Warehouse

Notes & Details

Use this Regency Spec Line 18" x 24" stainless steel wire shelf to outfit your facility with convenient storage. Made of thick, durable type 304 stainless steel wire, the shelf holds up to 700 lb., and because stainless steel is naturally corrosion-resistant, it isn't coated. This means that the shelf won't chip and leave patches of metal exposed to rust and corrode. As a result, the unit is perfect for any location and application where storage is needed. Whether set up in a damp dish room or used for storing dry, bulk ingredients, this shelf is the perfect choice! Thanks to its neutral color and classic design, it will even gracefully blend into front-of-house display and merchandising spaces. Plus, its high-quality design is commercial-grade and delivers the reliable performance every business expects and needs.

Regardless of what it helps to store or display, the shelf features a convenient design to maximize airflow between and around products. The ability to move it to different heights works to enhance airflow while providing you with the convenience of customization. Together with posts, additional shelves, and accessories (sold separately) of your choosing, you can use this shelf to create a customized storage solution to best meet your facility's needs and space.

This shelf comes with 4 pairs of split sleeves for quick and easy setup and installation. To assemble, simply snap 2 split sleeves around each post at one of the incrementally notched lines. After you snap the split sleeves on, fit the shelf down over each post to hold it in place.
