Notes & Details

Keep your kitchen organized by mounting this Regency Spec Line Tables and Sinks 15" x 20" x 5" galvanized steel drawer to the hat channels under your work table. Each drawer features an easy-to-clean stainless steel front and utilizes self-closing ball-bearing slides. This upgraded feature makes the drawer quieter and easier to close, while also preventing slamming that can lead to staff injury or damage to the slide components. The drawer pan is made of 22 gauge, type 304 stainless steel. They also have built-in locks, allowing you to secure the drawer's contents with ease for added security.

Installation is easy thanks to the pre-drilled Z-brackets - simply drill through the table's hat channels and secure the drawer with screws. The drawer can also stack up to 3 high if you need to add more storage down the road - to add a drawer, drill into the bottom of the top drawer's frame, and use screws to mount the lower drawer.

This drawer is compatible with select 24" and 30" deep Regency tables. It includes the screws and hex nuts necessary to either mount the Z-brackets to the table, or to attach it to the bottom of another drawer.
