Notes & Details

The Regency 6" x 6" PVD gold finish surface-mount beer drip tray with rinser is the perfect addition to your bar service area! It is ideal for placing under beer taps and makes for a great spot to temporarily sit a drink after it is poured so that any overflow is caught and collected. This rail is designed to be surface-mounted beneath beer or other beverage taps.

The built-in sprayer, attached to a 1/2" NPT water inlet, will quickly spray a stream of water into glasses which will rinse them out and also make the inside of the glass wet for a cleaner pour. Made of 18 gauge type 304 stainless steel, you can expect a tough and durable composition, as well as the benefit of being non-corrosive. The top grate features draining slots and is removable for easy cleaning and maintenance. A brass 3 1/2" x 5/8"-18 threaded drain allows any liquids to flow out of the rail, preventing overflows onto the floor or counter.
