Notes & Details

The Regency 12" beer drip tray is the perfect addition to your bar service area! It is ideal for placing under beer taps and makes for a great spot to temporarily sit a drink after it is poured so that any overflow is caught and collected. This rail is designed to be flush mounted beneath beer or other beverage taps.

Made of 18 gauge type 304 stainless steel, you can expect a tough and durable composition, as well as the benefit of being non-corrosive. The top grate features draining slots and is removable for easy cleaning and maintenance. A 3 1/2" x 5/8"-18 brass drain allows any liquids to flow out of the rail, preventing overflows onto the floor or counter.
