Notes & Details

Allow beer foam, water, and other excess liquid to cleanly funnel with this Regency 36" stainless steel flush mount beer drip tray! This drip tray is ideal for bartenders to set draught beers on prior to service. It mounts flush with your countertop underneath your beer tap or soda fountain.

This drip tray's 18 gauge, 304 stainless steel construction resists rust for long-lasting use in your restaurant or bar, and the removable perforated grate allows for easy cleaning. The drain on the bottom easily attaches to drain lines for convenient automatic drainage. A 3 1/2" x 5/8"-18 threaded brass drain allows any liquids to flow out of the rail, preventing overflows onto the floor or counter. Plus, the precision louvered top prevents liquid from collecting on the grid.
