Notes & Details

Give your employees a convenient way to quickly wash their hands with this Regency utility hand sink with one faucet! Make sure the employees at your industrial facility always have the ability to wash their hands by using this Regency utility hand sink with one faucet. It is made of durable stainless steel for longevity and comes with a gooseneck faucet. This sink is especially convenient because it mounts directly to the wall and does not need a countertop for support.

Perfect for industrial applications, the advantage of a utility sink is that it helps to maintain cleanliness in your business and prevent the spread of germs, keeping your employees healthy. Made of rugged 16 gauge type 304 stainless steel, this sink is not only rust- and corrosion-resistant, but it's also extremely durable and built for everyday commercial use. For safety, the outer edge of the sink bowl is curled under to eliminate any sharp edges.

This wall-mounted sink station includes 1 set of holes punched on 8" centers, with each center faucet hole measuring 1 1/4" in diameter, allowing you to install the included faucet. One Regency wall-mounted gooseneck faucet with 3 1/2" spouts is the perfect addition to this sink as the gooseneck shape provides the right amount of clearance for handwashing. This faucet offers a 2 GPM flow rate and has a 1/2" NPT connection. It comes equipped with two easy-to-use labeled lever handles each and features an attractive chrome-plated brass construction. Designed for wall-mounting, this sink includes (2) 1 5/8" tubular wall brackets and 2 stainless steel Z brackets. Installation is simple and the wall brackets ensure that the sink is stable and fully supported while allowing full clearance underneath. A backsplash protects your walls from splashing and water damage, and a 3 1/2" drain basket keeps your drains clog-free. The protective construction is sure to help you maintain a sanitary environment in your auto garage, distribution center, or manufacturing facility.
