Notes & Details

Prevent spills and keep your hand sink up to code by using this Regency hand sink side splash kit! This kit includes one stainless steel panel for each side of your sink, which install easily using the included double-sided adhesive. Compatible with your Regency hand sink, it can also be used on products from other popular brands including Advance Tabco - the sink just needs a backsplash measuring 8" or higher, and must measure 14" or longer from front to back.

This kit will help keep water from splashing on the floor and save you time cleaning up messes but more importantly it also ensures that your sink complies with food code. If sinks are located within 18" of food, food contact surfaces, or utensil washing and storage area surfaces you must use effective splash protection to avoid a violation, making this a much more cost-effective option to a total sink replacement or kitchen reconfiguration. Each panel is made from 18 gauge type 304 stainless steel for superior durability and corrosion resistance.
