Notes & Details

Keep your countertops and floors clean in your bar or club with the help of this Regency black matte beer drip tray. This product provides the perfect spot for bartenders to set drinks before serving to catch any overflow and prevent drips and spills before they reach the surrounding surfaces. This ensures the utmost safety by minimizing the risk of your bartenders or customers slipping on the wet floor. This drip tray is designed to be mounted underneath beer taps and on countertops, making a secure and stable platform for filled glasses. It even boasts an attractive black matte design to complement your bar.

Made of 18 gauge, type 304 stainless steel, you can expect a tough and durable composition, as well as the benefit of being non-corrosive. The top grate features draining slots and is removable for easy cleaning and maintenance. A brass 3 1/2" x 5/8"-18 threaded drain allows any liquids to flow out of the base of the tray, preventing overflows on the floor or counter. Perfect for catching spilled drinks and beer foam, equip your high-volume bar, pub, or club with this drip tray to keep your space sanitary and up to code!
