Notes & Details

Provide a handwashing station at your food truck, outdoor catering event, or festival with this Regency portable hand sink cart! This sleek-looking, space-efficient stainless steel cart includes a soap and paper towel dispenser for a proper sanitation station. The sink features a 5 gallon removable fresh water tank and a 7.5 gallon removable waste water tank for self-contained operation.

With a chrome-plated brass faucet body and ceramic cartridges engineered for durability, the included deck-mounted faucet provides the industry-leading quality you expect. This faucet features an 8" long swivel gooseneck spout that provides a sleek look with plenty of clearance, while a 2 GPM aerator provides a consistent flow rate and minimal splashing. It boasts a set of 4" adjustable centers, while the deck-mounted design is easy to install with 1/2" male NPS inlets.

This faucet uses ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed. This removes the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. The sturdy lever handle design makes it easy to turn the water flow off and on.

Designed to supply hot and cold water, this unit uses a 2.5 gallon water heater tank to provide hot water for a more sanitary and comfortable handwashing experience. This cart boasts an 18 gauge, 304 stainless steel body with a lock and key swing door so you can store away backup supplies without worry of them being taken. Additionally, the paper towel dispenser accommodates both M-fold and C-fold paper towels (sold separately) for added versatility. The water heater and pump require a 120V electrical connection for operation.
