Notes & Details

This one compartment commercial sink from Regency is constructed from high-quality, 16- gauge, type 304 stainless steel. This gauge is thicker and much more durable than many similar sinks that are available. Additionally, type 304 stainless steel offers exceptional corrosion resistance!

The tub of this sink is 12" deep and die-stamped to a minimum of 1/4" to ensure proper drainage. It measures 23" x 23" with a 3 1/2" basket strainer for collecting excess waste particles. For easy cleaning, the compartment has rounded corners.

The backsplash is 10" tall and has two 1 1/8" diameter holes punched on 8" centers for a wall-mounted faucet (sold separately). This sink features raised rolled edges along both the front and sides to contain splashes and overflow. The legs are constructed of 1 5/8" diameter galvanized steel, with galvanized leg sockets and adjustable plastic bullet feet. Designed for medium-duty use, this Regency sink is ideal for most restaurants.
