Notes & Details

This Regency 24" x 48" stainless steel commercial work table with undershelf provides additional work space in your busy kitchen. Great for prepping entrees, sides, and desserts, it's constructed from 18 gauge, 304 series stainless steel which offers greater durability and corrosion resistance than type 430 stainless steel. It has a smooth, easy-to-clean surface which makes this work table an ideal addition to your establishment. With the ability to hold up to 460 lb. of evenly distributed weight on the top shelf and 340 lb. on the undershelf, this work table provides additional storage options in crowded kitchens or tight work spaces.

The adjustable, galvanized steel undershelf should be placed 6" off of the ground when used in food service applications to comply with food safety regulations. Plus, a height of 34" allows you to create a comfortable work station for your employees. For increased stability, the (4) 28" legs of this work table are 1 5/8" in diameter and are also made of tubular galvanized steel, with 5" casters to make your table fully mobile while remaining at standard working height. With brakes on 2 of the casters, you can make sure the unit does not move when you don't want it to. However, if you wish for the unit to not be mobile, then the legs also come with adjustable plastic bullet feet for stationary use.
