Notes & Details

This stainless steel commercial 24" x 30" work table is designed to provide additional space for preparation or storage in your commercial kitchen, bar, or restaurant. Its 18-gauge type 304 stainless steel top can support up to 400 lb. of evenly distributed weight, providing superior corrosion resistance and durability, while the work table's undershelf is constructed from 18-gauge galvanized steel and can hold up to 300 lb.

A 4" high backsplash is included to help protect walls and contain items on the work top. For increased stability, the legs of this work table are 1 5/8" in diameter and are also made of tubular galvanized steel, with casters to make your table fully mobile. With brakes on 2 of the casters, you can make sure the unit does not move when you don't want it to. Additionally, this item includes 4 extra 28" legs that will not raise the height of your work table when paired with your compatible 5" casters! However, if you wish for the unit to not be mobile, then the legs also come with adjustable plastic bullet feet for stationary use.
