Features

- Corrosion-resistant 18-gauge type 304 stainless steel top
- Includes undershef, overshelf, legs, drawer, and pot rack
- Adjustable feet provide stability
- 430 lb. top shelf weight capacity; 320 lb. undershef weight capacity
- Easy-to-clean surface is great for busy commercial kitchens

Certifications

Certified by NSF

## Plan View

Technical drawing of a 10-hole punch tape. The top view shows a rectangular tape with 10 holes. The overall width is 11 1/2 inches, and the distance between the centers of the first and last holes is 10 9/16 inches. The hole diameter is 1 5/16 inches, and the distance from the edge to the center of the first hole is 2 3/16 inches. The side view shows the tape's thickness is 2 inches and the hole depth is 3/16 inches.

Technical drawing of the 'Banco' coffee table. The top view shows a rectangular frame with an outer width of 24" and an inner width of 20". The outer depth is 23 3/4" and the inner depth is 20". The side view shows a table with a total length of 22 5/8", a front leg height of 3 3/8", a back leg height of 5 3/8", and a seat height of 1 3/8". The table has a 3" thick top and a 1/4" thick base. The seat is 2 1/4" high and 3" wide. The backrest is 1" high and 3/8" wide. The table is made of wood with a 3/4" thick top and a 1/4" thick base.

Technical drawing of the table showing dimensions: 36" wide, 32" high, 1 1/2" thick, 3 1/2" high, 1 1/2" thick, and 34" high.

Technical drawing of a chair with the following dimensions:

- Seat width: 12"
- Seat height: 32"
- Seat depth: 24"
- Seat thickness: 3 1/2"
- Seat to floor height: 34"
- Seat to floor height (excluding seat): 5 3/8"
- Seat to floor height (excluding seat and seat thickness): 23 3/8"

A diagram of a rectangular piece of paper. The overall dimensions are 36 inches in width and 24 inches in height. A dashed rectangle inside represents the area after a 1-inch border is removed, with dimensions 34 inches in width and 22 inches in height. The border is 1 inch wide on all sides.

## Notes & Details

This Regency 24" x 36" stainless steel commercial work table with undershelf provides additional work space in your busy kitchen. Great for prepping entrees, sides, and desserts, it's constructed from 18-gauge, 304 series stainless steel which offers greater durability and corrosion resistance than type 430 stainless steel. It has a smooth, easy-to-clean surface which makes this work table an ideal addition to your establishment. With the ability to hold up to 430 lb. of evenly distributed weight on the top shelf and 320 lb. on the undershelf, and 380 lb. on the overshelf and 240 lb. on the bottom shelf, this work table provides additional storage options in crowded kitchens or tight work spaces.

The adjustable, galvanized steel undershelf should be placed 6" off of the ground when used in food service applications to comply with food safety regulations. Plus, a height of 34" allows you to create a comfortable work station for your employees. The stainless steel 12" deep overshelf has two storage shelves to maximize the available space of your kitchen. The double shelf design adds more capacity than a single shelf and allows you to better organize your spices and seasoning, pans, cotton towels, oven mitts, and other frequently used cooking and preparation items. The galvanized steel drawer has a stainless steel front, and moves on ball-bearing sides.

The stainless steel leg mounted pot rack lets you maximize the space on your unit while freeing up valuable space in your facility. Featuring 6 chrome-plated, double prong pot hooks, this pot rack provides ample space to keep your establishment organized to ensure maximum efficiency.

For increased stability, the legs of this work table are 1 5/8" in diameter and are also made of tubular galvanized steel. They feature a 28" height, and keep the unit in place for stationary applications, such as equipment operation or meal preparation. Hardware for mounting the overshelf to the table is sold separately.
