Notes & Details

This Regency 24" x 48" stainless steel commercial work table with undershelf provides additional work space in your busy kitchen. Great for prepping entrees, sides, and desserts, it's constructed from 18-gauge, 304 series stainless steel which offers greater durability and corrosion resistance than type 430 stainless steel. It has a smooth, easy-to-clean surface which makes this work table an ideal addition to your establishment. With the ability to hold up to 460 lb. of evenly distributed weight on the top shelf and 340 lb. on the undershelf, and 380 lb. on the overshelf and 240 lb. on the bottom shelf, this work table provides additional storage options in crowded kitchens or tight work spaces.

The adjustable, galvanized steel undershelf should be placed 6" off of the ground when used in food service applications to comply with food safety regulations. Plus, a height of 34" allows you to create a comfortable work station for your employees. The stainless steel 12" deep overshelf has two storage shelves to maximize the available space of your kitchen. The double shelf design adds more capacity than a single shelf and allows you to better organize your spices and seasoning, pans, cotton towels, oven mitts, and other frequently used cooking and preparation items. The galvanized steel drawer has a stainless steel front, and moves on ball-bearing sides.

The stainless steel leg mounted pot rack lets you maximize the space on your unit while freeing up valuable space in your facility. Featuring 6 chrome-plated, double prong pot hooks, this pot rack provides ample space to keep your establishment organized to ensure maximum efficiency.

For increased stability, the legs of this work table are 1 5/8" in diameter and are also made of tubular galvanized steel. They feature a 28" height, and keep the unit in place for stationary applications, such as equipment operation or meal preparation. Hardware for mounting the overshelf to the table is sold separately.
