

High Heat Spoon Scraper

Rubbermaid's new High Heat Spoon Scraper takes the heat without a scratch.

Designed especially for commercial foodservice and hospitality applications, Rubbermaid's High Heat Spoon Scraper offers the same benefits you already enjoy with our existing line of High Heat Scrapers. It's versatile, efficient, and safe—safe for direct food contact and safe for employee handling.

Whether frying, spreading, or scooping, the spoon-shaped head fits the task. The flexible spoon material stays attractive longer because it's stain-resistant, easy to clean, and resists heat up to 500°F/260°C. It's more gentle on your cookware than metal or wood so both scrapers and cookware need replacing less often.

The High Heat Spoon Scraper is safe for food contact. The handle is permanently bonded to the blade for durability and cleanability. Available in 9 1/2", 13 1/2", and 16 1/2" lengths, the break-resistant handle stays cool so it's also safe for employee handling. The non-slip hook helps prevent the scraper from sliding onto grills or into pans.

Rubbermaid's High Heat Spoon Scraper is a professional-grade tool for commercial-size jobs. It promotes operational efficiency and food and employee safety. It can stand the heat—so keep it in the kitchen.

Scrapers are certified to NSF Std. #2 for safe food contact.

Spoon-shaped head is ideal for frying, spreading or scooping.

Cool-touch handle is safe and comfortable to use; pan hook helps keep scraper from sliding into pan.

Stain-resistant and easy-to-clean spoon retains its professional look longer.

Scraper resists heat up to 500°F/260°C.

Flexible head is gentle on valuable cookware.
