Notes & Details

Keep your beautifully baked breads, savory steamed vegetables, or freshly fried sides fresh and ready to serve at your buffet, banquet hall, or cafeteria with the ServIt BLPT-4 pass through 4 bulb heat lamp! This heat lamp is quite versatile thanks to its countertop design, so you can keep the food warm directly in the serving area. When the food is in view, you can keep an eye on the intensity of the heat reaching your food to prevent over-drying.

This warmer lamp is made of heavy-duty powder-coated aluminum to withstand the daily demands of your busy fast food restaurant, concession stand, or snack bar. The lamp features 2 easy-to-use on / off switches, for added independent control over multiple dishes at once. Four clear, 250W bulbs are included. This food warmer requires a 120V electrical connection and has an output of 1000W.
