Notes & Details

Maintain the optimal temperature and quality of your food with this ServIt CHIUFISF full size insulated holding cabinet with solid door! This cabinet boasts high-quality insulation technology and a solid door, allowing the cabinet's interior heat to be retained. Its durable, polymer construction ensures that it will stay free from any dents, impacts, or stains that may occur in high-volume businesses, and its cool touch exterior prevents employees from any mishaps or burns. For optimal use, this cabinet features an easily accessible module that contains a thermometer, recessed control dials, a master on / off switch, and power indicator lights. These controls are easy to use and save you time and energy!

With this holding cabinet's holding module, you can effortlessly maintain the freshness of your food while it's waiting to be served. The module is thermostatically controlled through a forced air heating system, reducing the time that it takes to heat up and be ready for use. With this holding cabinet, you can store batches of freshly-cooked food and be confident that it will maintain its quality consistency and temperature from the time it's placed in the cabinet until service. This makes it ideal for high-volume businesses and catered events, where hot food may need to be prepared ahead of time or stored as back-up portions.

This cabinet features solid, insulated, aluminum construction for superior strength and durability in even the harshest commercial settings. The interior heater holds your prepared foods at temperatures ranging from 80 to 200 degrees Fahrenheit. A one-piece, double-hinged door swings out 180 degrees for optimal convenience during loading and unloading. Four plate-mounted swivel casters with two brakes provide additional mobility and stability. As for functionality, this cabinet's universal slides are fully adjustable on 1 1/2" increments and can accommodate up to 17 full size sheet pans or 34 full size steam pans. The slides also allow pans to be bottom loaded, so there's no interference if the top is covered with foil. This holding cabinet is ideal for commercial kitchens and off-site catered events. A 120V electrical connection is required.
