## Notes & Details

---

Ensure your most popular cold foods stay chilled throughout the day with this Servit four pan drop-in refrigerated cold food well. This cold food well is designed to hold pre-chilled food at a safe serving temperature, keeping it perfectly chilled and ready to eat for your guests without affecting quality. It's perfect for restaurants, cafeterias, buffets, and salad bars, holding salads, fruits, vegetables, and other chilled products. It features recessed wells and a digital controller that makes this unit easy to use.

This cold food well can hold four full size 12" x 20" food pans up to 6" deep. For long-lasting durability, this unit features a robust 18 gauge type 304 stainless steel top and well liner and a 20 gauge type 430 stainless steel exterior, making the outside body easy to clean and resistant to corrosion. This well is also easy to clean thanks to its 3/4" NPT drain for quick cleaning and defrosting, and it has a manual defrost and simplified installation. To maintain a consistent temperature, the bottom-mounted 1/3 hp compressor circulates high-performance R-290 refrigerant to cool the cold wall refrigerated unit. This unit requires a 120V electrical connection for operation.
