Notes & Details

This ServIt 423STESFT tubular fixed end tray slide is a perfect companion for steam tables. Tray slides like this one give customers and employees a place to set down trays and plates while they get their food, preventing the spills and broken dinnerware that can occur from having to hold these items while serving. And since it mounts on the end it can also be a great place to keep commonly-used items like toppings or condiments. It features a fixed, tubular design, and is made from stainless steel for easy cleaning and added durability. Mounting hardware is included, and compatible steam tables will have pre-drilled holes to make installation a breeze.
