Notes & Details

These ServIt 423SWLEGS 10-16" adjustable stainless steel t-legs for ServIt strip warmers are the perfect solution for taking your strip warmer on the go! The legs are adjustable between 10"-16" to accommodate any of your dishes, providing gentle heat that warms but does not dry out your food. They utilize the holes that are already available on ServIt strip warmers, so no retro-fit is necessary. The durable and reliable stainless steel construction will make these legs a staple for your catering event, concession stand, or barbecue needs. The attached rubber feet help reduce movement and improve stability in the warmer, virtually eliminating accidental slips or tip-overs.
