Notes & Details

The perfect companion for ServIt TCW chip warmers, the TCWSTAND allows you to mount your unit at a comfortable working height and also make it mobile too! This stand is specially designed to work with your warmer, with a top-mounted channel frame that is sized to hold your unit more securely than an ordinary equipment stand. This feature, paired with the casters on the base, makes it easy to move if you want to relocate it for better merchandising, or for cleaning and loading more product. When you want to lock it in place and make it stationary, 2 of the casters include a brake.

Additionally, this stand comes with an undershelf, which gives you additional space to store supplies like chip trays and condiments. It comes unassembled to reduce shipping costs, but its intuitive design assembles easily and is ready to use in minutes.
