

STAINLESS STEEL BIRD SPIKES

PREVENT BIRDS FROM LANDING AND ROOSTING ON SURFACES

Stainless Steel Bird Spikes have been the industry standard for over 20 years. Bird spikes are a 100% effective, maintenance-free and permanent solution to pest bird infestation. The spikes are not harmful – just irritating, intimidating, and uninviting, making it difficult, if not impossible, to land on the treated surface. The heavy duty stainless steel won't corrode and the UV-treated flexible polycarbonate base allows for installation on curved surfaces. Spikes come in a variety of sizes, heights and widths, and in lengths of up to 100 feet.

SLIM

STANDARD

EXTRA WIDE

EXTRA TALL

Coverage	Each section of spikes covers 2 linear feet
Base Width	0.8" base width
Height	Highest point 4.3" (5.75" for Extra-Tall)
