Type	Packaging Machines
Vacuum Packaging Machine Type	Automatic

Notes & Details

Preserve the freshness of your most popular foods and increase their shelf life with this VacPak-It VSM12PRO external vacuum sealer with 12" seal bar with cutter and roll holder! Utilize this unit to create an airtight seal around meats, cheeses, and vegetables, extending their freshness and taste longer than other preservation methods, saving you money. The VacPak-It vacuum packaging machine features a 12" seal bar and clamp down handlebar to quickly create tight seals within seconds, making this efficient machine a time saver for your establishment. It also comes with one 11" roll of bags and a 17 11/16" vacuum hose to make packaging easy.

You can use the intuitive controls to adjust the sealer to the perfect setting for efficient sealing of a variety of items. The pulse function gradually pulls the vacuum to accommodate sharp or delicate foods so they stay intact and decrease the chance of puncturing the bag. The unit also features a food setting with a choice of moist or dry to indicate if you are sealing a wet or dry item so the sealer will perform accordingly to reduce the chance of spillage. The included nozzle can be used with a vacuum canister (sold separately) for canning or sealing moist product that would otherwise be difficult to seal in a bag. The machine includes a dedicated storage space for packaging and can house a roll of bags for convenient access. Plus, the built-in roll cutter facilitates convenient accessibility and usage. This unit requires a 120V electrical connection for operation.
