Notes & Details

With this VacPak-It WM-18 single 18" roll film wrapping machine, you can swiftly wrap and store food in your grocery store, deli, or restaurant. Featuring a 6" x 15" PTFE-coated hot plate with 750 watts of heating power, this unit provides an air-tight seal for your wrapped food that preserves freshness. Perfect for fast-paced applications, the plate is heated to provide dependable warmth for effortless sealing. Plus, a non-stick design eliminates the potential for your wrapping film to tear or slip off the unit's surface. This versatile machine can hold one roll of plastic wrap up to 18" wide with an 8" diameter and 3" core, making it great for small footprints.

A heavy-duty stainless steel exterior and aluminum base construction ensure long-lasting durability, while on / off toggle controls and an adjustable hot plate thermostat add extra user convenience. In addition, large rubber feet add stability to the unit, so you don't have to worry about the unit sliding during operation. Thanks to its fast and easy wrapping capabilities, the freshness of your packaged cheese, meats, and veggies instantly increases, making this unit a welcome addition to any prep area.
